LIMITED MANUFACTURER’S WARRANTY

The manufacturer warrants that goods sold to the original user shall be free from defects in material and workmanship as follows:

1-year parts and labor on the entire unit.

DAY 1-30: A unit that fails within the first 15 days after the sale to an end-user may be eligible to be replaced with a new unit at the sole discretion of the manufacturer. All transportation costs will be covered for the customer.

DAY 30-YEAR 1: A unit that fails between 15 and 365 days after sale will have parts and labor charges covered under warranty, but transportation charges are to be paid by the customer. Transportation costs include travel charges by repair personnel, or shipping charges to move the unit to and from a repair location. The manufacturer will not be responsible for:

1. Used filter life / replacement filters.
2. Damage due to failure to perform normal maintenance as outlined in the instruction Manual.
3. Failure to start due to voltage conditions, blown fuses, open circuit breakers, or any other damages due to the inadequacy or interruption of electrical services.
4. Damage or repairs needed as a consequence of any misapplication, abuse, neglect, unauthorized alteration, improper servicing, or operation, including operation outside the voltage and frequency limitations as stated on the unit rating plate.
5. Damage as a result of flooding (immersion), fires, lightning, freezing of residual water, corrosive environment, or other conditions beyond the control of the manufacturer.
6. Reimbursement for warrantable replacement parts not supplied by the manufacturer.
7. Shipping damage, or damage as a result of abuse in transporting the unit.
8. The manufacturer does not warrant that the goods sold are merchantable or fit for any particular purpose, and makes no warranties other than as stated in this section.
9. All warranties, guaranties, or representations, express or implied, by operation of law or otherwise, are expressly disclaimed. If circumstance warrants, the manufacturer may opt to refund the purchase price of such goods. Where applicable, as indicated above, the manufacturer will pay return transportation charges on returned goods not exceeding the transportation charges applicable to ship from original destination unless the returned goods are free from defect and conform to specifications. Be sure to review this instruction booklet. Returned goods which are found by the manufacturer to be free from defect and conform to specifications shall be held for Purchaser’s shipping instructions, which shall be furnished promptly upon request.
10. The manufacturer’s liability shall in no event extend beyond replacement, repair or refund of the purchase price and shall not be liable under any circumstances for special, contingent, incidental or consequential damages, nor for losses, damages, or expenses directly or indirectly arising from the use of the goods, including without limitation, warehousing, labor, handling and service charges, die, equipment, or machine breakage, nor for costs, lost profits or loss of goodwill. The use of Substitute parts and/or filters in this product voids all warranties and performance claims. The remedies set forth herein are exclusive.

Any replacement parts supplied under warranty will be warranted for the balance of the product’s warranty. Establishing the proof of purchase date for warranty purposes is the responsibility of the end-use customer. Failing which, the effective date will be based upon the date of manufacture plus thirty (30) days. Retain your bill of sale as proof of purchase.

For warranty information and assistance contact B-Air® at 877.800.2247 or email warranty@b-air.com.
Read all warnings and instructions before using this unit.

The B-Air® Raptor 650 HEPA Air Scrubber is a portable filtration system that removes airborne particles including mold, pet dander, dust, pollen, drywall dust, and other miscellaneous debris as small as 0.3 microns. The Raptor 650 utilizes up to 3 stages of filtration including a pre-filter, optional 2nd stage, and a HEPA filter. The Raptor 650 will create cleaner air in any environment. The pre-filter and second stage filter capture larger particles and the HEPA filter captures smaller particles.

**Warnings!**
- Do not move or carry the Raptor 650 while it is operating. When the Raptor 650 is operating, the powerful air flow can cause unpredictable movement.
- Never allow children to play with or around the Raptor 650.
- Do not alter or modify your Raptor 650 in any way. Use only replacement parts authorized by B-Air®. Modifications or use of unauthorized parts could create a hazard and will void your warranty.
- Store the Raptor 650 in a clean, dry environment. Do not store outdoors or allow water inside the unit’s motor. If the motor becomes wet, allow it to thoroughly dry before use.
- The Raptor 650 should never be operated near water as it will create a risk of serious injury from electrical shock. Handle unit with care to avoid causing damage or injury.
- The Raptor 650 should always be operated on a flat surface. Do not operate where unit could fall, or on slippery surfaces, as this could increase the chance of injury, fire, or electrical shock.
- Keep all liquids from being drawn into the Raptor 650 and never operate unit without factory installed safety inlet and outlet grills in place.
- Do not use the Raptor 650 near combustible gas, or hot air as unit could melt and cause a fire or electrical hazard.
- Do not take the Raptor 650 apart or repair it unless you are qualified to do so. Never repair or service unit while Raptor 650 is plugged in.
- Make sure the air intake and outlet are free from all materials and away from obstructions. Any restrictions may cause the Raptor 650 to overheat and cause a shock or fire hazard.
- Unplug the Raptor 650 before performing any service or changing filters.
- Do not stack more than 2 units high in order to avoid a tipping hazard – falling equipment can cause bodily harm.

**Operation**
1) Place the Raptor 650 upright on a level and stable surface with the handle up.
2) Remove the dust cover.
3) Plug the Raptor 650 into a grounded 115 volt grounded outlet with the correct voltage and amperage. For maximum protection against electrical shock, ALWAYS use a circuit that is protected by a ground fault circuit interrupter. If you are unsure about the outlet, check with a qualified electrician or service person. Do not use an adapter or extension cord.
4) To switch the unit on, locate the control panel and turn the variable speed switch clockwise to the desired speed setting.
5) Operate unit until area is clear of unwanted contaminates or until filters need to be changed. The control panel has a filter change light which illuminates when the HEPA filter needs to be changed. See section on changing filters for instructions.

**Auxiliary/GFCI Outlet/Daisy Chain**
You can interconnect (“daisy-chain”) up to three Raptor 650’s to customize your air filtration needs. The GFCI will “trip” if it detects a sudden “ground fault,” or overload and interrupt the electric current. When the GFCI “trips,” unplug the unit and look for potential hazards or unsafe amount of electricity passing through the unit. If the GFCI outlet and cuts off power to the unit when it detects an unsafe amount of electricity passing through the unit. If the switch “trips,” unplug the unit and look for potential hazards or anything that may be creating a overload situation. “Reset” breaker by pushing button in and continue normal operation.

**Changing Filters**

**Warning! Contaminated Hazard**
Always wear NIOSH compliant protective gear when changing filters and dispose of used filters according to your local regulations.

Filters should be changed after every remediation job and whenever the filter change indicator light comes on. The unit should also be cleaned after each job to prevent cross-contamination. Make sure the unit is dry before installing clean filters.

**To change filters:**
1) Unplug the Raptor 650
2) Open door by releasing sliding latches outward, away from the Raptor 650 body.
3) Remove used filters and install new filters.
4) Close door and plug the unit in a grounded outlet before operating.

**Troubleshooting**

**Problem**
Raptor 650 does not turn on
Raptor 650 starts and then shuts off
Raptor 650 vibrates
Raptor 650 change light illuminated
Motor makes noises, but Raptor 650 won’t turn on

**Possible Cause/Solution**
- Switch not turned on-turn switch “on”
- Circuit breaker or GFCI has tripped-push rest button
- No power to scrubber-make sure unit is plugged in check power supply
- Faulty switch-replace
- Obstructed inlet/outlet - remove obstruction
- Faulty motor - replace
- Motor shaft is bent - replace motor
- Fan blade is bent - replace
- Excessive dirt built up on fan blade - clean by wiping with a slightly damp cloth
- HEPA filter needs replacement - replace
- Air intake restricted - remove restriction or bends/kinks in ducting
- Damaged/misuse motor or motor shaft - replace
- Broken/loose wire to capacitor - tighten
- Damaged/misuse capacitor - replace
- Damaged housing/Tan so fan will not spin - replace housing or fan wheel
- Motor shaft set screw holding fan wheel is loose - tighten

**Specifications**
- **Dimensions:**
  - 23 x 23 x 51 cm
- **Weight:** 12 kg
- **Motor:** 120 V, 60 Hz, 2.5 Amps
- **CFM:** 250 – 500
- **Pre-Filter:** G4
- **Prime-Filter:** H13 (Made in Germany)
- **Current:** 2.5 amps
- **Power:** 115 Volts, 60 Hz
- **Motor Rating:** .33 hp

**Circuit Breaker Switch**
The Raptor 650 is equipped with a circuit breaker switch to protect the Raptor 650. The switch is located directly above the GFCI outlet and cuts off power to the unit when it detects an unsafe amount of electricity passing through the unit. If the switch “trips,” unplug the unit and look for potential hazards or anything that may be creating a overload situation. “Reset” breaker by pushing button in and continue normal operation.

**Warning!**
For the safe operation of this machine follow the instructions given in this booklet and the training provided. Failure to do so can result in personal injury and/or damage to machine and property!

**DO NOT OPERATE MACHINE IN AN EXPLOSIVE ENVIRONMENT!**
**NOTE:** In Canada, the use of a temporary adapter is not permitted by the Canadian Electrical Code.
