INDUSTRIAL - AQUEOUS PARTS CLEANER

OPERATION & INSTRUCTION MANUAL

EM6000

I. Introduction

A. Manufacturer’s Statement

This manual will provide you with important information about the Aqueous Parts Cleaners and will instruct you on how to use this equipment in a safe manner.

The information contained in this manual is necessary for the safe, proper setup and operation of your Aqueous Parts Cleaner.

Keep this manual, along with the Material Safety Data Sheets (MSDS) for the solution in use, within easy reach of the operator of this parts cleaner.

The equipment described in this manual is subject to change. The manufacturer reserves the right to change equipment at any time as part of normal product improvement. Some improvements may have been made after this manual was printed. For the latest information on your equipment, contact the manufacturer.

B. General Information

⚠️ CAUTION

READ AND UNDERSTAND ALL LABELS, MSDS, AND THIS INSTRUCTION MANUAL BEFORE USE.

The Industrial Aqueous Parts Cleaner is an economical, safe, and innovative system designed to clean parts, using an aqueous based solution. Aqueous solutions, when used to clean grease and oil, must be disposed of properly. Consult your local environmental management agency for additional guidance and other potentially hazardous materials compliance requirements.

Install your parts cleaner on a flat, level surface in an area provided with adequate ventilation. Avoid repeated or prolonged breathing of vapors. Do NOT use compressed air to dry parts as this may cause a high concentration of vapors in the immediate area. Local exhaust ventilation should be used in areas of high vapor concentration. Provisions for determining and maintaining adequate ventilation are the responsibility of the operator.

Make sure the parts cleaner is connected to a properly grounded power source. Check serial plate for power requirements.

Do NOT allow the parts cleaner to operate unattended.
II. Safety Instructions and Information

Complete safety in use is dependent upon proper use and handling of the parts cleaner in your workplace.

It is important that you follow the instructions provided in this manual. If you fail to read, understand, and follow all of the procedures in this manual, you may cause or suffer personal injury.

**DO NOT OPERATE ELECTRICAL EQUIPMENT INSIDE OF PARTS CLEANER.**

⚠️ **CAUTION**

USE ONLY WATER-BASED CLEANING SOLUTIONS
DO NOT USE MINERAL SPIRITS

This equipment is designed for use only with Aqueous Based Solutions. Do **NOT** add any other chemicals to the cleaning agent including, but not limited to, kerosene, fuel oil, gasoline, or chlorinated solutions. The use of any other solutions could potentially cause a hazardous condition.

⚠️ **CAUTION**

DO NOT ALLOW HEATER TO OPERATE UNATTENDED FOR LONG PERIODS, SUCH AS EVENINGS OR WEEKENDS.

Avoid contact with eyes or skin. Wear protective eyewear, gloves, and clothing. Operation should be conducted in a manner, which prevents splashing, or spillage. Any spills should be promptly and properly cleaned up. Soak up all spills with absorbent material. Remove and dispose of all soaked material in accordance with regulatory requirements.

This unit is **NOT** intended for outdoor operation.

Do **NOT** leave solution-soaked rags in parts cleaner or in uncovered containers.

Do **NOT** obstruct the cover. It is designed to close automatically in the event of a fire. The safety link and cover closing mechanism must be intact. Do **NOT** substitute with any other type of cover positioning device. Do **NOT** leave large objects in the parts cleaner or hang anything on the cover that could prevent the cover from closing in the event of a fire.

Do **NOT** place heavy objects on edges or front of sink. Although this parts cleaner is designed to be stable, uneven weight distribution could cause a hazardous condition.

Do **NOT** contaminate cleaning solutions with gasoline, alcohol or flammable liquids.

When cleaning carburetors or other fuel supplying components: remove all gasoline into a proper disposal container before placing the component into the parts cleaner.

Do **NOT** spray aerosols into or around this machine. Install the equipment in an area away from heat, sparks, and open flame. Never put hot parts into the solution.

Do **NOT** use compressed air to dry parts. Be sure parts, especially brake parts, are completely dry prior to reassembly.

Turn unit "OFF" and close lid when equipment is not in use. This will reduce evaporation.
A. Important Safety Instructions

1. Read all instructions.

2. Care must be taken as burns can occur from touching hot parts.

3. Do not operate equipment with a damaged cord or if the equipment has been dropped or damaged – until it has been examined by a qualified service person.

4. If an extension cord is necessary, a cord with a current rating equal to or more than that of the equipment should be used. Cords rated for less current than the equipment may overheat. Care should be taken to arrange the cord so that it will not be tripped over or pulled.

5. Always unplug equipment from electrical outlet when not in use. Never use the cord to pull the plug from the outlet. Grasp plug and pull to disconnect.

6. To reduce the risk of fire, do NOT operate equipment in the vicinity of open containers of flammable liquids (gasoline).

7. To reduce the risk of electric shock, do NOT use on wet surfaces or expose to rain.

8. Use only as described in this manual. Use only manufacturer’s recommended attachments.

9. ALWAYS WEAR SAFETY GLASSES. Everyday eyeglasses only have impact resistant lenses, they are not safety glasses.

10. Do NOT operate any electrical equipment inside sink or vat.

11. Do NOT use light bulbs rated over 40 watts.

12. Do NOT smoke, eat or drink in the work area.

13. Do NOT modify these machines.

14. Do NOT operate this unit in any manner that will cause splashing or cause mist to form.

15. Use only aqueous solution.

16. Adjust flexible nozzle or flow-thru brush so solution is directed to inside the sink only.

17. On the Control box, set the breaker switches to OFF before plugging in unit.

18. In any emergency, turn off the unit.

19. These parts washers employ a safety feature called a fusible link that holds the cover open during use. Do NOT modify, alter, or obstruct the operation of the fusible link.

20. Keep cover closed whenever unit is not in use.

21. Do NOT remove fluid from this equipment or it may cause malfunction or unsafe conditions.

SAVE THESE INSTRUCTIONS
B. Service

Call your representative should your parts cleaner need service and always unplug unit when servicing.

Inspect and keep in good working order the power cord and all electrical components. If components show signs of damage or wear replace immediately. All work should be done by a trained technician.

Do NOT replace pump before unplugging unit and letting it completely cool down.

Do NOT replace fusible link with any other device to hold lid up. If fusible link should fail, for any reason, call your representative immediately.

C. Fire

This equipment is designed for use only with Aqueous Based Solutions. Do NOT add any other chemicals to the cleaning agent including, but not limited to, kerosene, fuel oil, gasoline, or chlorinated solutions. The use of any other solutions could potentially cause a hazardous condition.

Maintain the liquid level within the indicated operating range.

For your protection, a fusible link automatically closes the cover of the parts cleaner in the event that a fire occurs in the sink work area. The closed cover contains and smothers the fire inside the sink. Do NOT leave large objects in the parts cleaner or hang anything on the cover that could prevent it from closing in the event of a fire. Do NOT replace fusible link with any other device to hold cover up.

IN CASE OF FIRE: Use a Type ABC or Type BC fire extinguisher. Do NOT use water. Contact your local fire department.

IN AN EMERGENCY, UNPLUG THE ELECTRICAL SUPPLY TO THE UNIT.

D. First Aid (Medical instructions)

Please note that these First Aid Precautions are for uncontaminated cleaning solutions only. Once the solution has been contaminated (i.e. with oil, grease, antifreeze, etc.), safety precautions should be adjusted according to the type of contaminant.

1. EYES: Contact may cause slight to moderate irritation. For direct contact, flush eyes with water for 10-15 minutes or until the material has been removed; be sure to remove contact lenses, if present, and to lift the upper and lower lids during rinsing. If irritation from vapors or mists develops, move victim into fresh air. Get medical attention if irritation persists.

2. SKIN: Prolonged or repeated contact tends to remove skin oils, possibly leading to dermatitis. Wash skin with soap and water. Remove contaminated clothing, rinse shoes and launder clothing before reuse. If irritation or pain develops or persists, seek medical attention.
3. **INHALATION (Breathing):** Prolonged exposure to concentrate-mist or vapor may cause mild irritation of nasal passages or throat. **Remove to fresh air immediately. Do not leave victim unattended. Get medical attention if irritation persists.**

4. **INGESTION (Swallowing):** (Uncontaminated cleaning solution) **Drink 4 to 8 ounces of water and seek medical attention. DO NOT induce vomiting.**

**E. Environmental**

1. **Avoid spilling solution.** Spilled solution can create slippery conditions, clean it up immediately. Close off area to traffic. Wear appropriate personal protective equipment to prevent eye and skin contact. Consult the Material Safety Data Sheet for instructions on clean up and disposal.

2. **Contain leaks promptly.** Notify local environmental authorities if necessary.

3. **Aqueous solutions, when used to clean grease and oil, must be disposed of properly.** Consult your local environmental management agency for additional guidance and other potentially hazardous materials compliance requirements.

4. **For further information consult the Material Safety Data Sheet provided by the solution supplier.**

**III. Installation**

1. Position reservoir on a hard, level surface in a well-ventilated area. Place the basin on the reservoir.

2. Fill solution reservoir to the correct level. This equipment is designed for use only with Aqueous Based Solutions. **Do NOT add any other chemicals to the cleaning agent including, but not limited to, kerosene, fuel oil, gasoline, or chlorinated solutions. The use of any other solutions could potentially cause a hazardous condition.**

   **Capacity Model EM6000 = 45 gal. (170.3 L.)**
   **Low Level = 35 gal. (132.5 L.)**

3. Plug the power cord into a properly grounded power source. Check serial plate for power requirements.

   **Power Requirements = 15 amp, 115 volt, 60 Hz**
IV. Operation

This unit has an automatic low-fluid control sensor. Unit operates on 40-45 gallons (151.4-170.3 L.) or more of fluid. When the fluid level decreases to 35 gallons (132.5 L.), pump will shut off. When this occurs, add 5-7 gallons (18.9-26.5 L.) of fluid to machine to reset low fluid control sensor. This will reactivate the pump.

Thermostat is “PRESET” do NOT adjust. Higher temperature could cause damage to skin.

A. Fluid Control Valves

There are two valves used for controlling fluid flow.

1. The spigot valve controls fluid flow to the spigot.
2. The brush valve controls fluid flow to the brush.

B. Fluid Filter.

Periodically remove the fluid filter and clean.

1. Remove filter from basin.
2. Unscrew nut from bottom of filter.
3. Remove filter and replace with new filter.
4. Replace washer and nut.
5. Place filter back into unit.
V. Cleaning

1. Turn OFF heater and pump, let cool.
2. Lift basin out of reservoir and set on top of reservoir.
3. Disconnect the cam coupler on the hose and place the basin on the ground.
4. Place hose from the pump over the side of the reservoir and into the container being used to hold the waste fluid.
5. Turn ON the pump and pump the fluid level down to the point where the pump quits pumping.
6. Evacuate the balance of the fluid and clean excess residue from bottom of reservoir.
7. Clean any scale build up off the heater and thermowell tube with a wire brush.
8. Refill unit with proper amount of fluid.
9. Reinstall the basin and reconnect the cam coupler.
10. Turn ON the heater and the pump and check for proper operation.

VI. Parts Breakdown

1. FLO-THRU BRUSH.................................................................8169
2. FLEX HOSE .......................................................... 13-10164-01
3. VALVE ......................................................... 13-10164-02
4. STRAINER, FILTER ............................................... 04397
5. BASKET STRAINER .................................................. 16-10176
6. DOOR CLOSURE .................................................. 02-10698-150
7. FUSIBLE LINK ........................................................... 01178
8. FILTER BRACKET ........................................................... 62002
9. FILTER, 50 MIC CANISTER ........................................ MLF4850
10. FILTER MOUNT ............................................................ 04826
11. COUPLER, CAM .......................................................... 16-10204
12. COUPLER, CAM MALE ............................................... 16-10203
13. MODULE ASSEMBLY COMPLETE .................................... 61344
14. HEATER ................................................................. 12-10208
15. PUMP 115V ............................................................ 04727
16. POWER CORD .......................................................... 12-10146
17. SWITCH ROCKER ..................................................... 12-11143
18. LIQUID LEVEL SENSOR ............................................ 16-10211
19. THERMOSTAT ........................................................... 12-10149
VII. TROUBLESHOOTING

A. Machine does not operate:

1. Make sure the parts cleaner is connected to electric power or air supply.
2. Check for incoming power. Check serial plate for power requirements.
3. On electric units: check reset button on GFCI cord to make sure it is not tripped. On air units: an increase in air supply may be required.

B. Cleaning fluid not to temperature:

1. Check to make sure heater switch is turned "ON".
2. Check fluid level in tank.
3. Check to see if high temperature reset is tripped.

C. Little or no fluid flow thru the flow-thru brush:

1. Turn pump switch "ON" or increase air pressure.
2. Check the fluid level in the tank.
3. Check pump intake for obstructions.

---

**Diagram**

(Machine not functioning properly)

- **What does not work?**
- **Pump & heater**
- **Pump**
- **Turn on the switch**
- **Is the switch on?**
- **Is the fluid level high enough to submerge the pump?**
- **Yes**
  - **Add fluid**
  - **Open the valves**
- **No**
  - **Add fluid**
  - **Open the valves**

- **Is the machine plugged in to a grounded outlet?**
- **Yes**
  - **Plug in the machine**
  - **Apply power and reset GFCI cord**
  - **Press the reset button on the GFCI cord**
- **No**
  - **Replace the heater**

- **Is the machine plugged in to a grounded outlet?**
- **Yes**
  - **Plug in the machine**
  - **Apply power and reset GFCI cord**
  - **Press the reset button on the GFCI cord**
- **No**
  - **Replace the GFCI cord**

- **Is there power to the receptacle?**
- **Yes**
  - **Apply power and reset GFCI cord**
  - **Press the reset button on the GFCI cord**
- **No**
  - **Replace the GFCI cord**

- **Is the fluid temperature above 120 or below 100?**
- **Heater**
- **Turn on the switch**
- **Is the switch on?**
- **Is the high temperature reset tripped?**
- **Yes**
  - **Press the high temperature reset button**
  - **Replace the thermostat**
  - **Check the fluid temperature above 120 or below 100?**
- **No**
  - **Check the fluid level in tank**
  - **Check pump intake for obstructions**

- **Are all the wires in the control box hooked up?**
- **Yes**
  - **Plug in the wires**
  - **Replace the heater**
- **No**
  - **Plug in the wires**
  - **Replace the heater**

- **Is the reset on the GFCI cord tripped?**
- **Yes**
  - **Press the reset button on the GFCI cord**
  - **Replace the GFCI cord**
- **No**
  - **Replace the GFCI cord**
LIMITED WARRANTY AND LIMITATION OF REMEDIES AND DISCLAIMER. (1) Fountain Industries “Fountain” warrants the Equipment to be free from defects in material and manufacture and to conform to specifications for the Equipment at the time of shipment. This warranty is applicable only if the Equipment is installed, operated and maintained in accordance with factory recommendations and procedures. If any Equipment fails to conform to the specifications or samples or any defect in material or manufacture appears within twelve (12) months from the date of initial purchase by end user Fountain’s entire liability, and Customer’s exclusive remedy, shall be, to either repair or replace such defective Equipment, at Fountain’s option, within a reasonable time after written notification thereof and return of the defective Equipment to Fountain.

(2) THIS WARRANTY IS MADE IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTY OF MERCHANTABILITY, THE IMPLIED WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE, ANY IMPLIED WARRANTY ARISING OUT OF COURSE OF DEALING OR OF PERFORMANCE, CUSTOM OR USAGE OF TRADE EXCEPT OF TITLE AND AGAINST PATENT INFRINGEMENT.

(3) LIMITATION OF LIABILITIES; TIME LIMIT FOR FILING ACTION. NEITHER PARTY SHALL UNDER ANY CIRCUMSTANCES BE LIABLE TO EACH OTHER FOR DAMAGES OF ANY KIND, INCLUDING, WITHOUT LIMITATION, DIRECT, INDIRECT, INCIDENTAL, SPECIAL OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, LOSS OF PROFITS, REVENUE OR BUSINESS) RESULTING FROM OR IN ANY WAY RELATED TO THE EQUIPMENT, ANY OF CUSTOMER’S PURCHASE ORDERS, THESE TERMS AND CONDITIONS OR THE TERMINATION OR NONRENEWAL THEREOF.

FOUNTAIN’S LIABILITY ON ANY CLAIM OF ANY KIND (INCLUDING NEGLIGENCE) FOR ANY LOSS OR DAMAGE ARISING OUT OF OR RESULTING FROM THIS AGREEMENT, OR FROM THE PROFORMANCE OR BREACH THEREOF, OR FROM THE EQUIPMENT FURNISHED HEREUNDER SHALL IN NO CASE EXCEED THE PRICE OF THE SPECIFIC EQUIPMENT WHICH GIVES RISE TO THE CLAIM. ALL SUCH LIABILITY SHALL TERMINATE UPON THE EXPIRATION OF THE WARRANTY PERIOD AS STATED HEREIN.

This limitation applies regardless of whether such damages are sought based on breach of contract, negligence, strict liability in tort or any other legal theory.

(4) Any action for breach of warranty or any other obligation under these Terms and Conditions must be commenced within one year from the purported date of breach.

(5) Each limitation on liability or remedy set forth in these Terms and Conditions is independent of any other limitation or if they are otherwise held to be unenforceable, that shall not affect the validity of any other such limitation or remedy.

Fountain assumes no liability for any claims for injury or damages to persons or property arising from any chemical manufactured by Customers or by third party vendors for use in Fountain’s equipment.

Terms or conditions contained in any Customer purchase order or similar document that in any manner purport to alter, modify, change, or suspend these terms shall be deemed excluded from such purchase order and waived by the Customer.

This limited warranty does not cover or include consumable/wearable associated with such equipment.

Fountain assumes no liability for any unauthorized modifications carried out to the equipment not strictly recommended by the factory procedures.

This limited warranty is not transferable, and does not cover general equipment maintenance, demonstration, installation, routine servicing, calibration or customization of the equipment.

No person is authorized to alter or extend this limited warranty unless made in writing and signed by an authorized officer of Fountain.
