**CAUTION! READ ALL INSTRUCTIONS & WARNINGS BEFORE USE!**
OPERATING INSTRUCTIONS

1. Check the machine for any obstructions in the fan or airflow areas before plugging in the unit or operation of the unit.
2. Set the machine in the desired orientation for operation.
3. Plug the power cord into a grounded outlet. Do not use an extension cord.
4. Check GFCI protection by pushing “TEST” button. If operating properly, “RESET” button will pop out.
5. Do not plug more than 11 amps total into the GFCI outlet.
6. Ensure the switch is in the center OFF O position.
7. The machine has two power settings, Low | and High ||. ALWAYS start in the HIGH position, then to LOW if desired.
8. When daisy-chaining, turn one unit on at a time to prevent excessive current inrush from starting multiple units at one time.
9. Every month, press the “TEST” button to verify that it cuts-off power to the GFCI. To restore power, press “RESET”. If the red LED begins to flash, the receptacle has lost GFCI protection and should be replaced immediately.

GENERAL SAFETY WARNINGS

When using any electrical equipment, basic precautions should always be practiced, including the following:

- Not intended for outdoor use or storage.
